TO

25 JANUARY 2023

ABOUT VIT-AP SCHOOL OF LAW (VSL)

Legal education plays a significant role in nation building. VIT AP School of Law, VIT University is a novel endeavour in the direction of providing quality legal education and equipping the young minds with knowledge of law. Pursuing legal studies at VIT-AP School of Law (VSL), one of India's leading academic institutions, is taking a path to innovative learning and skill development. VSL offers an impressive curriculum that ranges wide and is determined to prepare students towards a global legal profession and assures that the graduates are practice ready for today's world. VSL courses are blended with business leanings and prepare graduates for taking up leadership roles in business positions with a sound legal background. This is achieved by the strong and rigorous practice sessions that are provided to the student's right from the first semester.

VIT-AP School of Law (VSL) established as part of VIT-AP University, near Vijayawada, VSL is established to impart quality legal education with a robust curriculum that prepares students for future legal challenges. The main objective is to promote global legal professionals with a passion for the ideals of social justice. VSL has impressive infrastructure with a wide range of facilities. Law Students can have an opportunity to work with and learn from engineering faculty while studying law particularly issues relating to Law and Technology, Cyber Security Law, Blockchain Technology, Machine learning, Artificial Intelligence, and Data protection. "With our moot court, legal aid clinics, human rights clinic, digital and data clinics, environmental clinics and intellectual property rights clinics, our students get an opportunity to work with experienced faculty and advocates in solving real-time legal problems and providing solutions as well.

FDP BACKGROUNDER

Intellectual Property protection is an essential tool to usher inflow of investment in innovation and also secure a return on the huge amount of time, energy and money put into unique and distinguished creations. Patents, trademarks and the like have incentivised innovation and paved the way for path-breaking inventions that benefitted the world in myriad ways. However, as the world is gripped by the Covid-19 crisis it has become imperative to review some of the most contentious issues of the IPR regime.

The debate on private rights (incentives to create) and public interest (ability to use or access the creations) has resurfaced with the present public health crisis. The emergency situation that

the world is faced with, today, has pushed all the stakeholders to reimagine the patent protections given to essential commodities like life-saving drugs, vaccines and health care equipment. The call from UNESCO's International Bioethics Committee (IBC) and the World Commission on the Ethics of Scientific Knowledge and Technology (COMEST) to treat Covid-19 vaccines as a public good is indicative of calls given by the international community. The support expressed by the US for WTO's Intellectual Property waiver on Covid-19 vaccines comes at a time when leading pharma companies continue to insist on selling vaccines and drugs at unaffordable prices. Facilitating accessibility and affordability of essential medicines, vaccine equity and shortage, technology transfer to developing countries, compulsory licensing and parallel imports are some of the raging topics of discussion in the domain of Public health and IPR.

IPR has overarching significance in various other fields that we operate in our daily lives as well. GM seeds and patents in agriculture have reoriented the face of agriculture around the world. Piracy continues to debilitate information and technology. Accessibility of academic scholarship for the betterment of human development urges the stakeholders to take a relook at the monopoly enjoyed by a conglomerate of publishing companies. A critical discussion of procedural aspects of the IPR regime, for example, the tribunalisation of Intellectual Property matters, along with insightful deliberation on conceptual themes will help us get a refreshing look at some very pertinent issues of Intellectual Property.

In the light of these pressing issues, the VIT-AP School of Law (VSL) of VIT-AP University at Andhra Pradesh is organising a Five Day Faculty Development Program to refresh and reorient the stakeholders on Critical issues of IPR. The FDP will feature interactive thematic sessions, workshops and informative presentations. Speakers and attendees will include leading academicians, counsels and experts from the field of Intellectual Property in India and from overseas.

THEMATIC SESSIONS
